

NINJA

HIDDEN DECK CLIP

Installations are 31% faster with the Grip-Rite® Ninja™ Hidden Deck Clip!.

Take the guesswork out of deck board spacing with one clip. No more frustration with clips falling out of the groove and onto the ground. The compression fit levers hold the clip in position and evenly space the deck boards making installation quick and easy. Simply insert the clips into the board at each joist, slide the next deck board in place, and fasten the PrimeGuard Max® coated stainless-steel screws. The serrated razor teeth grab the board on either side to ensure a secure hold...and the innovative Flex-Fit™ universal clip design means you can create
